

**GENERAL SERVICES ADMINISTRATION
Federal Acquisition Service
Authorized Federal Supply Schedule FSS Price List**

Tumbi JV, LLC dba
TUMBI TECHNOLOGY

Tumbi Technology is a Joint Venture between the following partners:
Red Cedar TG-MTE, LLC (Protégé) and UNCOMN, LLC (Mentor).

2115 Stephens Place, Suite 310
New Braunfels, TX 78130
(P) 830-549-3111
<https://tumbijv.com>

Contract Number: 47QTCA25D00AL
Contract Period: 21 May 2025 – 20 May 2030
Business Size: 8(a) Tribally Owned Small Disadvantaged Business
Special Item Number (SIN): 512180C, 54151S, OLM
Contract Administrator: Steven McDonald
steven.mcdonald@tumbijv.com

**Multiple Award Schedule
Federal Supply Group: Information Technology**

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order is available through GSA Advantage!™, a menu-driven database system. The INTERNET address for GSA Advantage!™ is: <http://www.GSAAdvantage.gov>.

For more information on ordering go to the following website:

TABLE OF CONTENTS

Customer Information.....	1
SIN 518210C Labor Information.....	6
SIN 54151S Professional IT Services	38

CUSTOMER INFORMATION

1a. Table of Awarded Special Item Number(s) with appropriate cross-reference to page numbers:

SIN	SIN Description
518210C	Cloud Computing and Related IT Professional Services
54151S	Professional Information Technology Services
OLM	Order-Level Materials (OLMs)

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. See pricing beginning on page 5.

1c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility, and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item. See Labor Category Descriptions beginning on page 10.

2. Maximum Order:

SIN 518210C - \$500,000
SIN 54151S - \$500,000
SIN OLM - \$250,000

3. Minimum Order: \$100.00

4. Geographic Coverage: Domestic.

5. Point(s) of production: Same as company address.

6. Discount from list prices or statement of net price: Government net prices (discounts already deducted).

7. Quantity discounts: Not Applicable.

8. Prompt payment terms: Net 30 Days. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9. Foreign items: None.

10a. Time of Delivery: Specified on the Task Order.

10b. Expedited Delivery: Contact Contractor.

10c. Overnight and 2-day delivery: Contact Contractor.

10d. Urgent Requirements: Contact Contractor.

11. F.O.B Points: Destination.

12a. Ordering Address: Contract Management
2115 Stephens Place, Suite 310
New Braunfels, TX 78130
(P) 830-549-3111
Tumbi-Biz@tubmijv.com

12b. Ordering procedures: See Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address (is): Tumbi JV, LLC
ATTN: Accounting
2115 Stephens Place, Suite 310
New Braunfels, TX 78130
(P) 830-549-3111
mtea.ap-ar@mteauthority.com

14. Warranty provision: Contractor's standard commercial warranty.

15. Export Packing Charges: Not Applicable.

16. Terms and conditions of rental, maintenance, and repair: Not Applicable.

17. Terms and conditions of installation: Not Applicable.

18a. Terms and conditions of repair parts: Not Applicable.

18b. Terms and conditions for any other services: Not Applicable.

19. List of service and distribution points: Not Applicable.

20. List of participating dealers: Not Applicable.

21. Preventive maintenance: Not Applicable.

22a. Environmental attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants: Not Applicable.

22b. If applicable, indicate that Section 508 compliance information is available for the information and communications technology (ICT) products and services and show where full details can be found (e.g. contractor's website or other location.) ICT accessibility standards can be found at: [https:// Section508.gov/](https://Section508.gov/). N/A

23. Unique Entity Identifier (UEI) Number: NTTPLJ2E51S3

24. Notification regarding registration in System for Award Management (SAM) database: Tumbi JV, LLC is registered at SAM.gov.

SIN 518210C LABOR INFORMATION

1. Scope

The prices, terms, and conditions stated under SIN 518210C Cloud Computing and Cloud Related IT Professional Services apply exclusively to cloud computing services and associated IT professional services within the scope of this Information Technology Schedule.

Place of Performance

The labor categories provided are for both Contractor and Customer facilities.

2. Clearance

The labor categories provided are for a Secret and below clearance.

3. Labor Category Descriptions

The descriptions provided describe the functional responsibilities, education, and experience requirements for each labor category.

CLOUD ADMINISTRATOR I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Performs basic administrative tasks in cloud environments under close supervision. Supports the setup of user accounts, service permissions, and resource configurations following established procedures. Monitors system status and documents activities in accordance with standard policies. Escalates anomalies or failures to senior staff for resolution. Builds initial familiarity with cloud service delivery models and develops fundamental operational skills.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ADMINISTRATOR II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Carries out a wider range of administrative functions across assigned cloud environments. Configures services, applies standard security and access policies, and manages scheduled maintenance routines such as backups and updates. Reviews monitoring data to identify potential issues, providing recommendations to prevent disruption. Resolves moderately complex incidents while coordinating with technical teams as needed. Maintains documentation and contributes to process improvements. Provides informal guidance to junior administrators and begins to demonstrate independent judgment in daily operations.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ADMINISTRATOR III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Leads the administration of multiple cloud platforms or environments with a focus on reliability and compliance. Establishes configuration standards, coordinates incident response, and develops recovery and continuity practices. Analyzes operational trends, prepares reports, and recommends changes to improve performance and efficiency. Partners with architects and engineers to ensure that administration aligns with organizational objectives. Mentors and trains junior staff, ensuring consistency and accuracy in operations. Plays a key role in developing and enforcing policies for secure and resilient administration practices.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ADMINISTRATOR IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Directs enterprise-wide cloud administration strategies, providing leadership and oversight across complex hybrid and multi-cloud environments. Defines and enforces governance frameworks, access policies, and lifecycle management practices. Oversees mission-critical operations, ensuring high availability, performance, and cost effectiveness. Advises executives on risks, strategic investments, and operational readiness for new or evolving services. Leads cross-functional collaboration with architecture, engineering, and security teams to establish long-term operational standards. Coaches administrators at all levels, ensuring that organizational knowledge, skills, and practices continually advance to meet emerging cloud service requirements.

Minimum Education: Master's degree or equivalent.

CLOUD ANALYST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Supports the monitoring and reporting of assigned cloud environments while working under close supervision. Observes cloud monitoring processes to develop baseline analytical skills. Collects usage data and organizes reports under senior guidance. Learn to interpret dashboards that track system health and performance. Contributes to compliance documentation by compiling technical evidence. Assists in preparing resource inventories for audits and assessments. Participate in cost reviews to understand billing models. Gains early exposure to workload optimization concepts and develops reporting proficiency.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ANALYST II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Analyzes cloud performance metrics and prepares recurring reports for leadership. Identifies anomalies in system behavior and escalates findings to

engineers. Reviews cost data and develop recommendations for workload right-sizing. Participate in compliance reviews by verifying configuration and reporting accuracy. Coordinates with administrators to validate usage patterns against billing records. Documents all findings and recommendations to support organizational transparency. Develop custom queries to extract relevant data from monitoring tools. Provides informal guidance to entry-level analysts in data collection techniques.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ANALYST III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Performs advanced analysis across multiple cloud platforms, identifying trends that inform enterprise planning. Develop dashboards and analytic tools that track usage, performance, and compliance. Coordinates with engineers to validate optimization opportunities and document savings. Reviews workload configurations to assess alignment with governance requirements. Mentors analysts by reviewing reports and teaching analytic methods. Collaborates with project managers to ensure analysis supports deliverable schedules. Presents findings in technical briefings to leadership. Improves data collection processes by integrating automation. Supports audit readiness by ensuring documentation accuracy.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ANALYST IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Directs enterprise-level analysis efforts across hybrid and multi-cloud environments. Establishes analytic frameworks and reporting standards for consistency across teams. Advises executives on investment strategies, capacity planning, and optimization priorities. Oversees creation of predictive models that anticipate future demand. Coordinates analysis during migration planning to validate resource requirements. Develops training programs that advance analytic maturity across the organization. Engage in strategic planning by presenting risk assessments to leadership. Represents the organization in external forums discussing cloud metrics and governance. Evaluates analytic tools and guides adoption of advanced platforms. Ensure reporting practices evolve with industry standards.

Minimum Education: Master's degree or equivalent.

CLOUD ARCHITECT I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Assists senior architects in developing design diagrams and documenting configuration baselines. Prepares inventories of resources to validate against project requirements. Observes design review sessions to understand architectural decision-making. Contributes to migration documentation by preparing checklists and dependencies. Research reference architectures to strengthen understanding of cloud patterns. Participates in pilot projects to apply design principles in

controlled settings. Gains exposure to governance frameworks and best practices for scalability.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ARCHITECT II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Designs small-scale cloud solutions by applying reference architectures and organizational templates. Prepares implementation plans and validates them with engineers. Reviews designs for compliance with cost, performance, and security requirements. Coordinates with developers to ensure integration requirements are captured. Documents design rationales to maintain transparency during reviews. Participates in modernization initiatives by recommending cloud-native services. Provides input into migration strategies for simple workloads. Offers support to entry-level architects by reviewing draft diagrams.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ARCHITECT III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Develops architecture for hybrid and multi-cloud systems supporting mission workloads. Defines governance models that enforce scalability, performance, and compliance standards. Coordinates with program managers and engineers to ensure designs align with organizational goals. Prepares detailed migration roadmaps and reviews cutover plans. Mentors junior architects by conducting technical workshops and providing structured feedback. Evaluates new services and incorporates them into design patterns when appropriate. Leads design reviews to ensure enterprise alignment. Documents integrate frameworks to support interoperability across services. Provides architecture briefings to stakeholders during planning sessions.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ARCHITECT IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Shapes enterprise-level cloud architecture strategies across distributed environments. Establishes standards for scalability, cost optimization, and resilience. Advises executives on long-term modernization roadmaps and adoption strategies. Coordinates with security leaders to integrate defense-in-depth principles into architecture. Oversees creation of enterprise reference architectures that can be reused across programs. Represents the organization in industry forums on cloud adoption. Develop training pathways for architects to strengthen organizational expertise. Reviews technology evaluations and makes adoption recommendations. Facilitates collaboration across multiple programs to ensure alignment. Ensures architecture decisions directly support mission readiness.

Minimum Education: Master's degree or equivalent.

CLOUD DEVELOPER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Assists in coding, testing, and documenting applications that run in cloud environments. Writes small code modules and integrates them into larger applications under supervision. Executes unit tests to validate functionality and records results. Participate in debugging sessions to identify issues in simple scripts. Reviews secure coding practices to build foundational knowledge. Contributes to documentation by updating design notes and technical records. Observes deployment activities to understand CI/CD pipelines. Gains early experience with cloud-native frameworks and development environments.

Minimum Education: Bachelor's degree or equivalent.

CLOUD DEVELOPER I – UNCOMN, LLC

Minimum/General Experience: 0 years of relevant technical experience.

Functional Responsibility: Cloud Developer develops, plans, and analyzes, designs products, and programs computer software that requires extensive research. Utilizes knowledge in the field of computer science or software engineering along with knowledge of software development and methodologies.

Minimum Education: Bachelor's degree or equivalent.

CLOUD DEVELOPER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Develops cloud-based applications using approved frameworks and languages. Conducts code reviews with peers to ensure quality and consistency. Integrates services using APIs and validates interoperability. Applies secure coding practices during development activities. Participates in system testing and validates performance benchmarks. Maintains repositories and ensures adherence to version control standards. Coordinates with DevOps engineers to align development with release schedules. Provides informal mentoring to entry-level developers in coding practices.

Minimum Education: Master's degree or equivalent.

CLOUD DEVELOPER II – UNCOMN, LLC

Minimum/General Experience: 3 years of relevant technical experience.

Functional Responsibility: Cloud Developer develops, plans and analyzes, designs products, and programs computer software that requires extensive research. Utilizes knowledge in the field of computer science or software engineering along with knowledge of software development and methodologies.

Minimum Education: Bachelor's degree or equivalent.

CLOUD DEVELOPER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Leads and implements scalable cloud-native services that integrate across enterprise systems. Oversee development tasks for multiple projects and ensure alignment with design patterns. Evaluates performance metrics to validate scalability and reliability. Coordinates with architects to confirm compliance with governance requirements. Mentors junior developers by reviewing code and providing technical training. Develops technical reports that document application designs and decisions. Prepares leadership briefings on progress and risks. Collaborates with DevOps engineers to streamline deployments. Investigates new frameworks and tools for potential adoption.

Minimum Education: Bachelor's degree or equivalent.

CLOUD DEVELOPER IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Defines enterprise development strategies and coding standards for cloud applications. Oversee design reviews to ensure technical integrity and architectural alignment. Advises executives on modernization priorities and resource investments. Coordinates with program managers to align development activities with organizational goals. Facilitates collaboration between development, DevOps, and architecture teams. Coaches developers across all levels to advance skills and ensure consistency. Represents the organization in external technical communities. Evaluates emerging frameworks and tools for enterprise adoption. Develop guidelines that integrate security and compliance into coding standards. Ensures development outcomes support long-term mission readiness.

Minimum Education: Master's degree or equivalent.

CLOUD DEVOPS ENGINEER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Supports automation activities within established CI/CD pipelines. Configure scripts under supervision to assist with deployments. Monitors logs and reports anomalies for senior review. Documents pipeline changes and maintain internal records. Participates in container deployment exercises to learn orchestration concepts. Contributes to troubleshooting sessions by gathering data. Gains familiarity with DevOps principles, tools, and workflows.

Minimum Education: Bachelor's degree or equivalent.

CLOUD DEVOPS ENGINEER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Builds and maintains pipelines to support development and operations teams. Creates automation scripts for common administrative tasks. Coordinates with engineers and developers to resolve pipeline issues. Validates that

compliance checks are integrated into deployment workflows. Documents technical changes and updates operational guides. Participate in governance reviews by presenting pipeline performance. Supports adoption of container orchestration tools. Provides informal mentoring to entry-level engineers.

Minimum Education: Bachelor's degree or equivalent.

CLOUD DEVOPS ENGINEER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Designs and manages pipelines across multiple efforts. Establishes monitoring dashboards and performance baselines for automated deployments. Coordinates release schedules with program managers and ensure operational readiness. Reviews pipeline code from junior engineers and provide technical coaching. Collaborates with architects to integrate governance requirements. Implements observability features such as logging and alerts. Prepares leadership reports on DevOps performance. Facilitates lessons learned sessions after major releases. Evaluates automation tools for enterprise adoption.

Minimum Education: Bachelor's degree or equivalent.

CLOUD DEVOPS ENGINEER IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Directs enterprise DevOps strategies across multi-cloud environments. Establishes organizational standards for automation and monitoring practices. Advises executives on release readiness and operational risk. Coordinates cross-team deployments to ensure stability and compliance. Oversees integration of governance and security requirements into pipelines. Coaches staff across all levels on advanced DevOps practices. Represents the organization in industry forums to share best practices. Reviews emerging technologies and provides adoption recommendations. Develop enterprise metrics that measure DevOps maturity. Ensures DevOps strategies remain aligned with mission requirements.

Minimum Education: Master's degree or equivalent.

CLOUD ENGINEER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Monitors assigned workloads and records performance data for review by senior staff. Configures virtual machines, storage, and networking resources under supervision. Executes patching cycles to gain experience in lifecycle management. Documents configurations and updates internal records. Responds to low-priority alerts by gathering data for incident reports. Participates in recovery exercises to understand continuity requirements. Gains exposure to engineering standards for cloud environments.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ENGINEER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Configures workloads independently and validates resource baselines. Coordinates with developers to troubleshoot application performance issues. Implements routine automation scripts for provisioning and monitoring. Documents engineering changes for compliance and operational transparency. Participates in migration activities by validating dependencies and cutover readiness. Tracks incident trends and communicates findings to leadership. Provides feedback on engineering standards to improve efficiency. Mentors junior staff informally by sharing best practices.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ENGINEER II – UNCOMN, LLC

Minimum/General Experience: 3 years of relevant technical experience.

Functional Responsibility: The Cloud Engineer demonstrates knowledge in wide application of principles, theories, and concepts in his/her field and provides solutions to a wide range of difficult problems with imaginative and thorough solutions; has demonstrated experience in some of the following topics: refactoring workloads for cloud solutions, migrating legacy or other systems to cloud solutions, cloud DevOps/DevSecOps, cloud security, developing and testing cloud native applications, or other cloud-oriented activities; works under very general supervision and results are reviewed upon completion for adequacy in meeting objectives; decisions achieve program schedule and cost objectives; maintains frequent internal and external customer contacts; and provides solutions to difficult technical problems related to specific projects.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ENGINEER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Designs engineering solutions that optimize performance and scalability across workloads. Implements advanced automation to improve provisioning, monitoring, and recovery processes. Coordinates incident resolution for major outages and prepares root cause analyses. Collaborates with architects to align designs with enterprise strategies. Prepare technical reports that document engineering metrics. Mentors junior engineers by reviewing work products and coaching technical growth. Participates in governance activities by contributing engineering data. Evaluates emerging tools to improve efficiency. Facilitate workshops to improve engineering practices.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ENGINEER III – UNCOMN, LLC

Minimum/General Experience: 7 years of relevant technical experience.

Functional Responsibility: The Cloud Engineer demonstrates knowledge in wide application of principles, theories, and concepts in his/her field and provides solutions to

a wide range of difficult problems with imaginative and thorough solutions; has demonstrated experience in some of the following topics: refactoring workloads for cloud solutions, migrating legacy or other systems to cloud solutions, cloud DevOps/DevSecOps, cloud security, developing and testing cloud native applications, or other cloud-oriented activities; works under very general supervision and results are reviewed upon completion for adequacy in meeting objectives; decisions achieve program schedule and cost objectives; maintains frequent internal and external customer contacts; and provides solutions to difficult technical problems related to specific projects.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ENGINEER IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Defines engineering strategies across enterprise workloads and ensures compliance with governance standards. Oversees automation adoption to streamline lifecycle management. Advises executives on engineering risks and modernization priorities. Coordinates cross-team incident response to ensure rapid recovery. Coaches engineers across all levels to strengthen organizational expertise. Represents the organization in industry discussions on cloud engineering. Reviews technical evaluations and makes adoption recommendations. Develops enterprise roadmaps that align engineering with mission goals. Facilitates collaboration across engineering and architecture teams. Ensure systems remain resilient and cost effective.

Minimum Education: Master's degree or equivalent.

CLOUD ENGINEER IV – UNCOMN, LLC

Minimum/General Experience: 10 years of relevant technical experience.

Functional Responsibility: The Cloud Engineer demonstrates knowledge in wide application of principles, theories, and concepts in his/her field and provides solutions to a wide range of difficult problems with imaginative and thorough solutions; has demonstrated experience in some of the following topics: refactoring workloads for cloud solutions, migrating legacy or other systems to cloud solutions, cloud DevOps/DevSecOps, cloud security, developing and testing cloud native applications, or other cloud-oriented activities; works under very general supervision and results are reviewed upon completion for adequacy in meeting objectives; decisions achieve program schedule and cost objectives; maintains frequent internal and external customer contacts; and provides solutions to difficult technical problems related to specific projects.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ENTERPRISE SOLUTIONS ENGINEER II – UNCOMN, LLC

Minimum/General Experience: 3 years of relevant technical experience.

Functional Responsibility: Cloud Engineer has specific experience in federal or state government enterprise-level programs who demonstrates knowledge in wide application of principles, theories, and concepts in his/her field and provides solutions to a wide range of difficult problems with imaginative and thorough solutions; has demonstrated

experience in some of the following topics: cloud computing strategy including assessing cloud solutions, developing cloud adoption plans, cloud application architecture, design, development, testing and cloud management, security, and monitoring; works under very general supervision and results are reviewed upon completion for adequacy in meeting cloud-related objectives; decisions achieve program schedule and cost objectives; maintains frequent internal and external customer contacts; and provides solutions to difficult technical problems related to specific projects.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ENTERPRISE SOLUTIONS ENGINEER III – UNCOMN, LLC

Minimum/General Experience: 7 years of relevant technical experience.

Functional Responsibility: Cloud Engineer has specific experience in federal or state government enterprise-level programs who demonstrates knowledge in wide application of principles, theories, and concepts in his/her field and provides solutions to a wide range of difficult problems with imaginative and thorough solutions; has demonstrated experience in some of the following topics: cloud computing strategy including assessing cloud solutions, developing cloud adoption plans, cloud application architecture, design, development, testing and cloud management, security, and monitoring; works under very general supervision and results are reviewed upon completion for adequacy in meeting cloud-related objectives; decisions achieve program schedule and cost objectives; maintains frequent internal and external customer contacts; and provides solutions to difficult technical problems related to specific projects.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ENTERPRISE SOLUTIONS ENGINEER IV – UNCOMN, LLC

Minimum/General Experience: 10 years of relevant technical experience.

Functional Responsibility: Cloud Engineer has specific experience in federal or state government enterprise-level programs who demonstrates knowledge in wide application of principles, theories, and concepts in his/her field and provides solutions to a wide range of difficult problems with imaginative and thorough solutions; has demonstrated experience in some of the following topics: cloud computing strategy including assessing cloud solutions, developing cloud adoption plans, cloud application architecture, design, development, testing and cloud management, security, and monitoring; works under very general supervision and results are reviewed upon completion for adequacy in meeting cloud-related objectives; decisions achieve program schedule and cost objectives; maintains frequent internal and external customer contacts; and provides solutions to difficult technical problems related to specific projects.

Minimum Education: Bachelor's degree or equivalent.

CLOUD ENTERPRISE SOLUTIONS ENGINEER V – UNCOMN, LLC

Minimum/General Experience: 14 years of relevant technical experience.

Functional Responsibility: Cloud Engineer has specific experience in federal or state government enterprise-level programs who demonstrates knowledge in wide application

of principles, theories, and concepts in his/her field and provides solutions to a wide range of difficult problems with imaginative and thorough solutions; has demonstrated experience in some of the following topics: cloud computing strategy including assessing cloud solutions, developing cloud adoption plans, cloud application architecture, design, development, testing and cloud management, security, and monitoring; works under very general supervision and results are reviewed upon completion for adequacy in meeting cloud-related objectives; decisions achieve program schedule and cost objectives; maintains frequent internal and external customer contacts; and provides solutions to difficult technical problems related to specific projects.

Minimum Education: Bachelor's degree or equivalent.

CLOUD MIGRATION SPECIALIST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Assists in planning and executing migrations under senior guidance. Collects workload inventories and documents system dependencies. Participates in migration rehearsals to practice transition steps. Supports cutover activities by validating transfers and reporting outcomes. Updates documentation after each migration cycle. Prepare rollback procedures with assistance from senior staff. Gains familiarity with migration methodologies and tools.

Minimum Education: Bachelor's degree or equivalent.

CLOUD MIGRATION SPECIALIST II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Plans migrations for small workloads and validates readiness with stakeholders. Coordinates with engineers to ensure dependencies are addressed. Documents migration procedures and provide reports after execution. Track cutover issues and communicate risks to project managers. Validates that rollback procedures are tested and available. Supports compliance documentation by recording migration evidence. Provides input into workload prioritization decisions. Mentors entry-level staff by reviewing inventories and schedules.

Minimum Education: Bachelor's degree or equivalent.

CLOUD MIGRATION SPECIALIST III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Develops migration plans for large or complex workloads. Prepares risk assessments, schedules, and validation reports. Oversees cutover execution to ensure continuity of operations. Collaborate with architects to align migration approaches with enterprise strategies. Facilitates lessons learned sessions to improve methodologies. Mentors migration staff by providing technical training and structured guidance. Reviews documentation to confirm accuracy and completeness. Provides leadership with progress reports and recommendations. Evaluates migration tools for efficiency and suitability.

Minimum Education: Bachelor's degree or equivalent.

CLOUD MIGRATION SPECIALIST IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Defines enterprise migration strategies across multi-cloud environments. Oversees planning and execution for mission-critical transitions. Advises executives on risks, opportunities, and resource requirements. Coordinates cross-functional teams to ensure migration success. Coaches staff across all levels in advanced migration methods. Represents the organization in external forums on migration practices. Reviews technology assessments and adoption proposals. Develops roadmaps that integrate migration with modernization initiatives. Facilitates collaboration between architects and engineers. Ensures organizational readiness for large-scale migrations.

Minimum Education: Master's degree or equivalent.

CLOUD PROGRAM MANAGER II – UNCOMN, LLC

Minimum/General Experience: 3 years of relevant technical experience.

Functional Responsibility: The Cloud Program Manager applies extensive expertise as a generalist or specialist; has demonstrated experience in providing management or governance of enterprise-level cloud solutions; solves complex problems which require the regular use of ingenuity and creativity; performs work without appreciable direction and is reviewed for desired results from a relatively long term perspective; decisions result in an organization achieving critical organizational objectives; may function in project leadership roles and represents the organization as prime customer contact on significant technical matters on contracts; and monitors cloud technology trends such as emerging standards for new technology opportunities.

Minimum Education: Bachelor's degree or equivalent.

CLOUD PROGRAM MANAGER III – UNCOMN, LLC

Minimum/General Experience: 7 years of relevant technical experience.

Functional Responsibility: The Cloud Program Manager applies extensive expertise as a generalist or specialist; has demonstrated experience in providing management or governance of enterprise-level cloud solutions; solves complex problems which require the regular use of ingenuity and creativity; performs work without appreciable direction and is reviewed for desired results from a relatively long term perspective; decisions result in an organization achieving critical organizational objectives; may function in project leadership roles and represents the organization as prime customer contact on significant technical matters on contracts; and monitors cloud technology trends such as emerging standards for new technology opportunities.

Minimum Education: Bachelor's degree or equivalent.

CLOUD PROJECT LEAD I – UNCOMN, LLC

Minimum/General Experience: 0 years of relevant technical experience.

Functional Responsibility: The Cloud Project Lead III manages, coordinates, and establishes priorities for complete life- cycle of cloud projects including the planning, design, programming, testing, and implementation of solutions designed to meet the project requirements. This resource determines cloud project needs and acquires resources required for the success of the project; designs cloud project plans which identify needs; and defines major tasks and milestones, based on scope, resources, budget, and personnel.

Minimum Education: Bachelor's degree or equivalent.

CLOUD PROJECT LEAD III – UNCOMN, LLC

Minimum/General Experience: 7 years of relevant technical experience.

Functional Responsibility: The Cloud Project Lead III manages, coordinates, and establishes priorities for complete life- cycle of cloud projects including the planning, design, programming, testing, and implementation of solutions designed to meet the project requirements. This resource determines cloud project needs and acquires resources required for the success of the project; designs cloud project plans which identify needs; and defines major tasks and milestones, based on scope, resources, budget, and personnel.

Minimum Education: Bachelor's degree or equivalent.

CLOUD PROJECT LEAD IV – UNCOMN, LLC

Minimum/General Experience: 10 years of relevant technical experience.

Functional Responsibility: The Cloud Project Lead III manages, coordinates, and establishes priorities for complete life- cycle of cloud projects including the planning, design, programming, testing, and implementation of solutions designed to meet the project requirements. This resource determines cloud project needs and acquires resources required for the success of the project; designs cloud project plans which identify needs; and defines major tasks and milestones, based on scope, resources, budget, and personnel.

Minimum Education: Bachelor's degree or equivalent.

CLOUD PROJECT MANAGER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Assists in planning activities and maintains project documentation. Tracks schedules and updates task lists under senior direction. Coordinates meeting logistics and records action items. Prepare basic reports to summarize project status. Observes risk review sessions to understand mitigation practices. Learns to use project management tools for scheduling and reporting. Gains foundational experience in managing cloud-focused initiatives.

Minimum Education: Bachelor's degree or equivalent.

CLOUD PROJECT MANAGER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Manages small cloud projects or specific workstreams. Defines schedules, tracks progress and maintains deliverable quality. Coordinates with engineers and developers to ensure tasks remain on track. Monitors risks and escalate concerns to leadership. Documents lessons learned and updates project records. Prepare status briefings for stakeholders. Provides informal mentoring to entry-level staff on project tracking. Reviews budgets to confirm alignment with project activities.

Minimum Education: Bachelor's degree or equivalent.

CLOUD PROJECT MANAGER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Coordinates multiple project efforts simultaneously and ensures alignment with program goals. Develops detailed project plans that include schedules, risks, and resource allocations. Oversees cross-team collaboration to resolve issues quickly. Mentors junior project managers through reviews and coaching sessions. Prepares leadership reports that summarize project risks and performance. Collaborate with architects to align projects with enterprise strategies. Facilitates lessons learned sessions after major deliveries. Reviews project management tools for efficiency. Provides recommendations to improve governance practices.

Minimum Education: Bachelor's degree or equivalent.

CLOUD PROJECT MANAGER IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Directs enterprise cloud program management functions across distributed environments. Establishes governance frameworks to standardize project execution. Advises executives on risk, performance, and investment priorities. Coordinates project portfolios to align with modernization strategies. Coaches project managers across all levels to strengthen delivery practices. Represents the organization in industry groups on cloud program management. Develop training resources to improve project execution. Reviews program-level performance metrics and prepares executive briefings. Facilitate collaboration across programs to ensure consistency. Ensures enterprise strategies are achieved through disciplined execution.

Minimum Education: Master's degree or equivalent.

CLOUD SECURITY SPECIALIST – UNCOMN, LLC

Minimum/General Experience: 0 years of relevant technical experience.

Functional Responsibility: The Cloud Security Specialist is a junior level position with solid knowledge regarding how to determine enterprise Information Assurance (IA) and security protocols for a cloud environment. Implements IA/security standards and

procedures. Coordinates, develops, and evaluates security programs for a cloud environment. Identifies, reports, and resolves security violations. Establishes and satisfies IA and security requirements based upon the analysis of user, policy, regulatory, and resource demands. Applies know-how to government and commercial common user cloud-based systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Performs analysis, design, and development of cloud security features for system architectures. Analyzes cloud security requirements for computer systems which may include mainframes, workstations, and personal computers. Implements solutions that meet cloud security requirements. Provides integration and implementation of the computer system cloud security solution. Analyzes general IA-related technical problems and provides basic engineering and technical support in solving these problems. Performs vulnerability/risk analyses of computer systems and applications during all phases of the system development life cycle. Ensures that all information systems are functional and secure. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. This individual operates with some managerial oversight.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SECURITY SPECIALIST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Assists in monitoring cloud systems for potential security issues. Records alert and gathers data for senior review. Applies basic configuration updates to maintain security baselines. Participates in vulnerability scans and documents results. Contributes to compliance documentation for audits. Observes incident response activities to understand escalation paths. Gains exposure to security tools and reporting methods.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SECURITY SPECIALIST II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Implements workload security settings such as encryption and logging. Responds to alerts and performs initial triage for incidents. Documents findings and prepare evidence for remediation. Reviews compliance requirements and ensures configurations are aligned. Participates in risk assessments and provides technical input. Coordinate with engineers to strengthen workload security. Tracks vulnerability management activities to confirm closure. Provides informal coaching to entry-level staff on basic practices.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SECURITY SPECIALIST III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Oversees security operations across multiple workloads. Designs monitoring dashboards and configures advanced detection tools. Coordinates

incident response activities and prepares root cause analyses. Reviews compliance documentation and validates evidence for audits. Mentors junior staff by reviewing reports and conducting training. Collaborate with architects to align security with enterprise strategies. Facilitates lessons learned sessions after major incidents. Prepare leadership briefings on security posture. Evaluates new tools for adoption in security programs.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SECURITY SPECIALIST IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Shapes enterprise security strategies for multi-cloud environments. Defines standards for monitoring, detection, and remediation. Advises executives on risks, threats, and investment needs. Oversees vulnerability management across workloads and providers. Coordinates with architects to integrate security into all designs. Coaches security specialists at all levels through structured programs. Represents the organization in security industry forums. Reviews and approves major security initiatives. Develop long-term road maps for improving security posture. Ensure enterprise systems remain compliant and resilient.

Minimum Education: Master's degree or equivalent.

CLOUD SME CONSULTANT I – UNCOMN, LLC

Minimum/General Experience: 5 years of relevant technical experience.

Functional Responsibility: The Cloud Security Specialist is a junior level position with solid knowledge regarding how to determine enterprise Information Assurance (IA) and security protocols for a cloud environment. Implements IA/security standards and procedures. Coordinates, develops, and evaluates security programs for a cloud environment. Identifies, reports, and resolves security violations. Establishes and satisfies IA and security requirements based upon the analysis of user, policy, regulatory, and resource demands. Applies know-how to government and commercial common user cloud-based systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Performs analysis, design, and development of cloud security features for system architectures. Analyzes cloud security requirements for computer systems which may include mainframes, workstations, and personal computers. Implements solutions that meet cloud security requirements. Provides integration and implementation of the computer system cloud security solution. Analyzes general IA-related technical problems and provides basic engineering and technical support in solving these problems. Performs vulnerability/risk analyses of computer systems and applications during all phases of the system development life cycle. Ensures that all information systems are functional and secure. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. This individual operates with some managerial oversight.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SME CONSULTANT II – UNCOMN, LLC

Minimum/General Experience: 9 years of relevant technical experience.

Functional Responsibility: The Cloud Security Specialist is a junior level position with solid knowledge regarding how to determine enterprise Information Assurance (IA) and security protocols for a cloud environment. Implements IA/security standards and procedures. Coordinates, develops, and evaluates security programs for a cloud environment. Identifies, reports, and resolves security violations. Establishes and satisfies IA and security requirements based upon the analysis of user, policy, regulatory, and resource demands. Applies know-how to government and commercial common user cloud-based systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Performs analysis, design, and development of cloud security features for system architectures. Analyzes cloud security requirements for computer systems which may include mainframes, workstations, and personal computers. Implements solutions that meet cloud security requirements. Provides integration and implementation of the computer system cloud security solution. Analyzes general IA-related technical problems and provides basic engineering and technical support in solving these problems. Performs vulnerability/risk analyses of computer systems and applications during all phases of the system development life cycle. Ensures that all information systems are functional and secure. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. This individual operates with some managerial oversight.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SME CONSULTANT III – UNCOMN, LLC

Minimum/General Experience: 11 years of relevant technical experience.

Functional Responsibility: The Cloud Security Specialist is a junior level position with solid knowledge regarding how to determine enterprise Information Assurance (IA) and security protocols for a cloud environment. Implements IA/security standards and procedures. Coordinates, develops, and evaluates security programs for a cloud environment. Identifies, reports, and resolves security violations. Establishes and satisfies IA and security requirements based upon the analysis of user, policy, regulatory, and resource demands. Applies know-how to government and commercial common user cloud-based systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Performs analysis, design, and development of cloud security features for system architectures. Analyzes cloud security requirements for computer systems which may include mainframes, workstations, and personal computers. Implements solutions that meet cloud security requirements. Provides integration and implementation of the computer system cloud security solution. Analyzes general IA-related technical problems and provides basic engineering and technical support in solving these problems. Performs vulnerability/risk analyses of computer systems and applications during all phases of the system development life cycle. Ensures that all information systems are functional and secure. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. This individual operates with some managerial oversight.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SME CONSULTANT IV – UNCOMN, LLC

Minimum/General Experience: 14 years of relevant technical experience.

Functional Responsibility: The Cloud Security Specialist is a junior level position with solid knowledge regarding how to determine enterprise Information Assurance (IA) and security protocols for a cloud environment. Implements IA/security standards and procedures. Coordinates, develops, and evaluates security programs for a cloud environment. Identifies, reports, and resolves security violations. Establishes and satisfies IA and security requirements based upon the analysis of user, policy, regulatory, and resource demands. Applies know-how to government and commercial common user cloud-based systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. This individual operates with some managerial oversight.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SUBJECT MATTER EXPERT I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Provides technical expertise on specific cloud technologies under the guidance of senior staff. Participates in design reviews and validates limited aspects of solutions. Responds to technical questions from project teams. Reviews documentation for accuracy and clarity. Supports troubleshooting activities by applying specialized knowledge. Contributes to training materials to share knowledge. Gains familiarity with broader enterprise cloud strategies.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SUBJECT MATTER EXPERT II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Advises teams on best practices for cloud adoption and usage. Participates in design reviews to validate approaches. Documents recommendations and provide technical input during planning. Assists with complex troubleshooting by applying specialized knowledge. Provides informal mentoring to staff on advanced techniques. Develops technical guides that capture lessons learned.

Collaborate with engineers to validate solutions. Reviews pilot projects to assess alignment with standards.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SUBJECT MATTER EXPERT III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Guides multiple projects by providing advanced technical expertise. Defines best practices for integration, scalability, and modernization. Mentors staff through structured training and performance reviews. Reviews architectural designs to confirm alignment with standards. Prepare reports summarizing risks and opportunities. Advises leadership on adoption of new services. Facilitates workshops to share knowledge across teams. Evaluates new technologies and provides recommendations. Coordinate with project managers to support complex initiatives.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SUBJECT MATTER EXPERT IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Provides enterprise-level guidance on cloud adoption strategies. Develops reference architectures and integration frameworks. Advises executives on modernization roadmaps and industry trends. Oversee technical evaluations and provide adoption recommendations. Coaches architects and engineers on advanced practices. Represents the organization in industry forums on cloud modernization. Prepares training programs to expand organizational expertise. Reviews enterprise-wide strategies to ensure alignment. Facilitates collaboration across programs to promote consistency. Ensures cloud adoption supports long-term mission success.

Minimum Education: Master's degree or equivalent.

CLOUD SUBJECT MATTER EXPERT V – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 7+ years of relevant technical experience.

Functional Responsibility: Serves as the top-level technical authority on enterprise cloud services. Defines organizational vision for adoption, integration, and modernization. Advises executive leadership on strategic investments. Represents the organization in government and industry working groups. Coaches technical leaders across programs. Oversees evaluation and adoption of emerging technologies. Develop long-term roadmaps for modernization and resilience. Prepares executive briefings on risks, opportunities, and readiness. Establishes standards that shape the enterprise cloud future. Ensures strategies remain aligned with evolving mission requirements.

Minimum Education: Master's degree or equivalent.

CLOUD SUPPORT SPECIALIST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Provides initial support for cloud services and applications. Responds to user requests, resolves common issues, and documents resolutions for reuse. Monitors help desk queues, record detailed troubleshooting notes, and escalate complex problems to higher-level staff. Gains exposure to ticketing systems, service catalog items, and standard troubleshooting procedures. Develop communication skills by assisting end users and delivering consistent customer service.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SUPPORT SPECIALIST II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Delivers intermediate-level support for cloud systems and environments. Troubleshoots recurring user issues, supports account and service access requests, and coordinates with administrators to address system-related problems. Maintains knowledge articles, updates user guides, and contributes to process improvements. Provides clear communication with users during incidents, ensuring they understand impacts, workarounds, and timelines for resolution. Guides junior support personnel in troubleshooting methods and service-level expectations, strengthening overall team performance.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SUPPORT SPECIALIST III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Leads advanced support activities across multiple services and organizational environments. Manages escalated incidents that involve complex integrations or cross-platform issues. Coordinates with engineering teams to validate fixes and improve diagnostic tools. Reviews support performance metrics, identify systemic issues, and recommend long-term improvements to reduce incident frequency. Develops training materials, conducts workshops, and mentors staff to improve problem resolution skills. Prepares reports for leadership summarizing support trends, risks, and user satisfaction. Plays a key role in ensuring readiness for new service deployments and major system changes.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SUPPORT SPECIALIST IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Oversees enterprise-level support functions for mission-critical cloud services. Defines support strategies, escalation protocols, and knowledge management frameworks. Establishes performance metrics, analyzes support data, and implements continuous improvement programs to enhance service delivery. Directs communications during major incidents, ensuring timely updates to leadership and end

users. Collaborates with technical and business leaders to ensure support readiness for migrations, platform upgrades, and new service rollouts. Resolves the most complex support challenges, balancing user experience with operational stability. Coaches and develops support staff at all levels, fostering a culture of accountability, professionalism, and continuous learning across the support function.

Minimum Education: Master's degree or equivalent.

CLOUD SYSTEM ADMINISTRATOR I – UNCOMN, LLC

Minimum/General Experience: 0 years of relevant technical experience.

Functional Responsibility: The Cloud System Administrator has knowledge about how to administer, develop, run tests on, implement, and maintain operating systems and other related software intended for a cloud environment; establish hardware and software, according to specific and parameters; troubleshoot and resolve software, operating system, and networking problems specific to cloud environments with the assistance of managerial oversight; schedule, perform, and monitor system backups and, when necessary; and perform data recoveries.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SYSTEM ADMINISTRATOR II – UNCOMN, LLC

Minimum/General Experience: 3 years of relevant technical experience.

Functional Responsibility: The Cloud System Administrator has knowledge about how to administer, develop, run tests on, implement, and maintain operating systems and other related software intended for a cloud environment; establish hardware and software, according to specific and parameters; troubleshoot and resolve software, operating system, and networking problems specific to cloud environments with the assistance of managerial oversight; schedule, perform, and monitor system backups and, when necessary; and perform data recoveries.

Minimum Education: Bachelor's degree or equivalent.

CLOUD SYSTEMS ARCHITECT IV – UNCOMN, LLC

Minimum/General Experience: 10 years of relevant technical experience.

Functional Responsibility: The Cloud Systems Architect is a senior resource that converts technical requirements into an architecture that enables cloud systems to function efficiently. Designs, develops, implements, utilizes, and conforms to enterprise cloud architecture application solutions, strategies, processes, and standards, focusing on expertise in cloud technologies. Designs high quality architectures and drives architecture activities that are aligned to organization requirements set by leadership on behalf of stakeholders and are consistent with enterprise architect standards. The Cloud Systems Architect IV works with minimal managerial oversight and often engages face to face with external parties.

Minimum Education: Bachelor's degree or equivalent.

CLOUD TEST ENGINEER I – UNCOMN, LLC

Minimum/General Experience: 0 years of relevant technical experience.

Functional Responsibility: The Cloud Test Engineer is an entry level resource that analyzes and runs test on new or modified software programs, including documentation, diagrams, flowcharts, and software development procedures that can be used to verify the programs are functioning according to user requirements and conform to established guidelines. Runs in-depth testing, detects problems, identifies possible solutions, and determines if program requirements have been met.

Minimum Education: Bachelor's degree or equivalent.

EXPERIENCE & DEGREE SUBSTITUTION EQUIVALENCIES

For SIN 518210C experience exceeding the minimum shown may be substituted for education. Likewise, education exceeding the minimum shown may be substituted for experience.

SIN 54151S PROFESSIONAL IT SERVICES

1. Scope

The prices, terms and conditions stated under SIN 54151S Information Technology Professional Services apply exclusively to IT/IAM Professional Services within the scope of this Information Technology Schedule.

2. Place of Performance

The labor categories provided are for both Contractor and Customer facilities.

3. Clearance

The labor categories provided are for a Top Secret and below clearance.

4. Labor Category Descriptions

The descriptions provided describe the functional responsibilities, education, and experience requirements for each labor category.

APPLICATIONS DEVELOPER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 year of relevant technical experience.

Functional Responsibility: Designs, develops, enhances, debugs, and implements software. Troubleshoots production problems related to software applications. Researches, tests, builds, and coordinates the conversion and/or integration of new products based on client requirements. Designs and develops new software products or major enhancements to existing software. Addresses problems of systems integration, compatibility, and multiple platforms. Consults with project teams and end users to identify application requirements. Performs feasibility analysis on potential future projects to management. Assists in the evaluation and recommendation of application software packages, application integration and testing tools. Resolves problems with software and responds to suggestions for improvements and enhancements. Acts as team leader on projects. Instructs, assigns, directs, and checks the work of other software developers on development team. Participates in development of software user manuals. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

APPLICATIONS DEVELOPER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Designs, develops, enhances, debugs, and implements software. Troubleshoots production problems related to software applications. Researches, tests, builds, and coordinates the conversion and/or integration of new products based on client requirements. Designs and develops new software products or major enhancements to existing software. Addresses problems of systems integration, compatibility, and multiple platforms. Consults with project teams and end users to identify application requirements. Performs feasibility analysis on potential future projects to

management. Assists in the evaluation and recommendation of application software packages, application integration and testing tools. Resolves problems with software and responds to suggestions for improvements and enhancements. Acts as team leader on projects. Instructs, assigns, directs, and checks the work of other software developers on development team. Participates in development of software user manuals. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

APPLICATIONS DEVELOPER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Designs, develops, enhances, debugs, and implements software. Troubleshoots production problems related to software applications. Researches, tests, builds, and coordinates the conversion and/or integration of new products based on client requirements. Designs and develops new software products or major enhancements to existing software. Addresses problems of systems integration, compatibility, and multiple platforms. Consults with project teams and end users to identify application requirements. Performs feasibility analysis on potential future projects to management. Assists in the evaluation and recommendation of application software packages, application integration and testing tools. Resolves problems with software and responds to suggestions for improvements and enhancements. Acts as team leader on projects. Instructs, assigns, directs, and checks the work of other software developers on development team. Participates in development of software user manuals. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

APPLICATIONS DEVELOPER IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Designs, develops, enhances, debugs, and implements software. Troubleshoots production problems related to software applications. Researches, tests, builds, and coordinates the conversion and/or integration of new products based on client requirements. Designs and develops new software products or major enhancements to existing software. Addresses problems of systems integration, compatibility, and multiple platforms. Consults with project teams and end users to identify application requirements. Performs feasibility analysis on potential future projects to management. Assists in the evaluation and recommendation of application software packages, application integration and testing tools. Resolves problems with software and responds to suggestions for improvements and enhancements. Acts as team leader on

projects. Instructs, assigns, directs, and checks the work of other software developers on development team. Participates in development of software user manuals. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Master's degree or equivalent.

APPLICATIONS SYSTEMS ANALYST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Formulates/defines system scope and objectives. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operating time, and form of desired results. Prepares detailed specifications for programs. Assists in the design, development, testing, implementation, and documentation of new software and enhancements of existing applications. Works with project managers, developers, and end users to ensure application designs meet business requirements. Formulates/defines specifications for complex operating software programming applications or modifies/maintains complex existing applications using engineering releases and utilities from the manufacturer. Designs, codes, tests, debugs, and documents those programs. Provides overall operating system, such as sophisticated file maintenance routines, large telecommunications networks, computer accounting, and advanced mathematical/scientific software packages. Assists in all phases of software systems programming applications. Evaluates new and existing software products. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

Minimum Education: Master's degree or equivalent.

BUSINESS ANALYST I – UNCOMN, LLC

Minimum/General Experience: 0–1 years of relevant technical experience.

Functional Responsibility: Reviews, analyzes, and evaluates business systems and user needs. Writes detailed description of user needs, program functions, and steps required to modify current or to develop new business initiatives. Assesses products and processes for compliance with government standards. Prepares milestone status reports and presentations. Resource planning may include a need for investment analysis, data warehousing, return on investment analysis, human resource analysis, material management, logistics, supply chain management, and knowledge management.

Minimum Education: Associates degree or equivalent.

BUSINESS ANALYST II – UNCOMN, LLC

Minimum/General Experience: 1–3 years of relevant technical experience.

Functional Responsibility: Reviews, analyzes, and evaluates business systems and user needs. Writes detailed description of user needs, program functions, and steps required to modify current or to develop new business initiatives. Assesses products and processes for compliance with government standards. Prepares milestone status reports and presentations. Resource planning may include a need for investment analysis, data warehousing, return on investment analysis, human resource analysis, material management, logistics, supply chain management, and knowledge management.

Minimum Education: Bachelor's degree or equivalent.

BUSINESS ANALYST III – UNCOMN, LLC

Minimum/General Experience: 3–5 years of relevant technical experience.

Functional Responsibility: Reviews, analyzes, and evaluates business systems and user needs. Writes detailed description of user needs, program functions, and steps required to modify current or to develop new business initiatives. Assesses products and processes for compliance with government standards. Prepares milestone status reports and presentations. Resource planning may include a need for investment analysis, data warehousing, return on investment analysis, human resource analysis, material management, logistics, supply chain management, and knowledge management.

Minimum Education: Bachelor's degree or equivalent.

BUSINESS ANALYST V – UNCOMN, LLC

Minimum/General Experience: 8 years of relevant technical experience.

Functional Responsibility: Reviews, analyzes, and evaluates business systems and user needs. Writes detailed description of user needs, program functions, and steps required to modify current or to develop new business initiatives. Assesses products and processes for compliance with government standards. Prepares milestone status reports and presentations. Resource planning may include a need for investment analysis, data warehousing, return on investment analysis, human resource analysis, material management, logistics, supply chain management, and knowledge management.

Minimum Education: Master's degree or equivalent.

BUSINESS SYSTEMS ANALYST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Formulates and defines systems scope and objectives based on both user needs and a thorough understanding of business systems and industry requirements. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operation time, and form of desired results. Includes analysis of business and user needs, documentation of requirements, and translation into proper system requirements specifications. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

BUSINESS SYSTEMS ANALYST II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Formulates and defines systems scope and objectives based on both user needs and a thorough understanding of business systems and industry requirements. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operation time, and form of desired results. Includes analysis of business and user needs, documentation of requirements, and translation into proper system requirements specifications. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

BUSINESS SYSTEMS ANALYST III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Formulates and defines systems scope and objectives based on both user needs and a thorough understanding of business systems and industry requirements. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operation time, and form of

desired results. Includes analysis of business and user needs, documentation of requirements, and translation into proper system requirements specifications. Contributes to deliverables and performance metrics where applicable. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

BUSINESS SYSTEMS ANALYST IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Formulates and defines systems scope and objectives based on both user needs and a thorough understanding of business systems and industry requirements. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operation time, and form of desired results. Includes analysis of business and user needs, documentation of requirements, and translation into proper system requirements specifications. Provides consultation on complex projects and is considered the top-level contributor/specialist of most phases of systems analysis, while considering the business implications of the application of technology to the current and future business environment. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Master's degree or equivalent.

COMPUTER GENERALIST – UNCOMN, LLC

Minimum/General Experience: 0–1 years of relevant technical experience.

Functional Responsibility: Provides administrative, clerical, and support services to technical, professional, and management level staff for project tasks. Work includes support of operational programs, preparation and monitoring of budgets, technical writing, editing, events planning and facilitation.

Minimum Education: Associates degree or equivalent.

CONFIGURATION MANAGEMENT SPECIALIST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Provides configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Regulates the change process so that only approved and validated changes are incorporated into product documents and related software.

Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with guidance in developing methodology and presenting solutions to problems. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

CONFIGURATION MANAGEMENT SPECIALIST II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Provides configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Regulates the change process so that only approved and validated changes are incorporated into product documents and related software. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

CONFIGURATION MANAGEMENT SPECIALIST III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Provides configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Regulates the change process so that only approved and validated changes are incorporated into product documents and related software. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

CONFIGURATION MANAGEMENT SPECIALIST IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 year of relevant technical experience.

Functional Responsibility: Provides configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Regulates the change process so that only approved and validated changes are incorporated into product documents and related software. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior

management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Master's degree or equivalent.

DATA ARCHITECT I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Designs and builds relational databases. Performs data access analysis design, and archive/recovery design and implementation. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in a data warehouse environment, which includes data design, database architecture, and metadata repository creation. Translates business needs into long-term architecture solutions. Defines, designs, and builds dimensional databases. Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Reviews and develops object and data models and the metadata repository to structure the data for better management and quicker access. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

DATA ARCHITECT II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 year of relevant technical experience.

Functional Responsibility: Designs and builds relational databases. Performs data access analysis design, and archive/recovery design and implementation. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in a data warehouse environment, which includes data design, database architecture, and metadata repository creation. Translates business needs into long-term architecture solutions. Defines, designs, and builds dimensional databases. Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Reviews and develops object and data models and the metadata repository to structure the data for better management and quicker access. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

DATA ARCHITECT III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Designs and builds relational databases. Performs data access analysis design, and archive/recovery design and implementation. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in a data warehouse environment, which includes data design, database architecture, and metadata repository creation. Translates business needs into long-term architecture solutions. Defines, designs, and builds dimensional databases. Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Reviews and develops object and data models and the metadata

repository to structure the data for better management and quicker access. Contributes to deliverables and performance metrics where applicable. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

May supervise others.

Minimum Education: Master's degree or equivalent.

DATABASE SPECIALIST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Provides all activities related to the administration of computerized databases. Projects long-range requirements for database administration and design in conjunction with other managers in the information systems function. Designs, creates, and maintains databases in a client/server environment. Conducts quality control and auditing of databases in a client/server environment to ensure accurate and appropriate use of data. Advises users on access to various client/server databases. Designs, implements, and maintains complex databases with respect to JCL, access methods, access time, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Applies knowledge and experience with database technologies, development methodologies, and front-end (e.g., COGNOS)/back-end programming languages (e.g., SQL). Performs database programming and supports systems design. Includes maintenance of database dictionaries, overall monitoring of standards and procedures, file design and storage, and integration of systems through database design. fundamental concepts, processes,

practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

Performs database programming and supports systems design. Includes maintenance of database dictionaries, overall monitoring of standards and procedures, file design and storage, and integration of systems through database design. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major

technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

DATABASE SPECIALIST IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Provides all activities related to the administration of computerized databases. Projects long-range requirements for database administration and design in conjunction with other managers in the information systems function. Designs, creates, and maintains databases in a client/server environment. Conducts quality control and auditing of databases in a client/server environment to ensure accurate and appropriate use of data. Advises users on access to various client/server databases. Designs, implements, and maintains complex databases with respect to JCL, access methods, access time, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Applies knowledge and experience with database technologies, development methodologies, and front-end (e.g., COGNOS)/back-end programming languages (e.g., SQL). Performs database programming and supports systems design. Includes maintenance of database dictionaries, overall monitoring of standards and procedures, file design and storage, and integration of systems through database design. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Master's degree or equivalent.

ENTERPRISE ARCHITECT I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Designs and develops complex business solutions using a variety of computer technologies. Independently performs a variety of system design and engineering tasks, which are broad in nature and are concerned with design and implementation of major enterprise systems development and integration, including supporting personnel, hardware, software, and support facilities and/or equipment. Considered a Subject Matter Expert (SME) in one or more specific areas of computer system design and networking. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

ENTERPRISE ARCHITECT II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Designs and develops complex business solutions using a variety of computer technologies. Independently performs a variety of system design and engineering tasks, which are broad in nature and are concerned with design and implementation of major enterprise systems development and integration, including supporting personnel, hardware, software, and support facilities and/or equipment. Considered a Subject Matter Expert (SME) in one or more specific areas of computer system design and networking. Applies knowledge of complex concepts and techniques to develop and implement automated solutions to engineering, scientific, or business data acquisition and management problems. Uses scientific and engineering logic to independently identify conceptual or theoretical solutions to problems of technology systems hardware or software design and operation. Evaluates and recommends optimum solutions balancing specific project needs with economic constraints. Formulates architectural design, functional specification, interfaces, and documentation of computer systems considering system interrelationships, operating modes, and equipment configurations. Responsible for developing project plans, justifications, guidelines, and controls. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

ENTERPRISE ARCHITECT III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Designs and develops complex business solutions using a variety of computer technologies. Minimum Education: Master's degree or equivalent.

HARDWARE ENGINEER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Provides analysis related to the design, development, and implementation of hardware for products. Develops test strategies, devices, and systems. Performs stress and performance tests on a variety of computer or network hardware including circuit boards, processors, and wiring. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

HARDWARE ENGINEER IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Responds to and diagnoses problems through discussion with users. Ensures a timely process through which problems are controlled. Includes problem recognition, research, isolation, resolution, and follow-up steps. Supervises operation of help desk and serves as focal point for customer concerns. Provides support to end users on a variety of issues. Identifies, researches, and resolves technical problems. Responds to telephone calls, email, and personnel requests for technical support. Documents, tracks, and monitors the problem to ensure a timely resolution. Provides second-tier support to end users for either PC, server, or mainframe applications or hardware. Interacts with network services, software systems engineering, and/or applications development to restore service and/or identify and correct core problems. Simulates or recreates user problems to resolve operating difficulties. Recommends systems modifications to reduce user problems. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management,

methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Master's degree or equivalent.

HELP DESK SPECIALIST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Minimum Education: Master's degree or equivalent.

INFORMATION ASSURANCE/SECURITY SPECIALIST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Determines enterprise information assurance and security standards. Develops and implements information assurance/security standards and procedures. Coordinates, develops, and evaluates security programs for an organization. Recommends information assurance/security solutions to support customer requirements. Identifies, reports, and resolves security violations. Establishes and satisfies information assurance and security requirements based upon the analysis of user, policy, regulatory, and resource demands. Supports customers at the highest levels in the development and implementation of doctrine and policies. Applies know-how to government and commercial common user systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Performs analysis, design, and development of security features for system architectures. Analyzes and defines security requirements for computer systems, which may include mainframes, workstations, and personal computers. Designs, develops, engineers, and implements solutions that meet security requirements. Provides integration and implementation of the computer system security solution. Analyzes general information assurance-related technical problems and provides basic engineering and technical support in solving these problems. Performs vulnerability/risk analyses of computer systems and applications during all phases of the system development life cycle. Ensures that all information systems are functional and secure. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

INFORMATION ASSURANCE/SECURITY SPECIALIST II – RED CEDAR TG-MTE, LLC

Minimum Education: Master's degree or equivalent.

IT ADMINISTRATOR I – UNCOMN, LLC

Minimum/General Experience: 0–1 years of relevant technical experience.

Functional Responsibility: Provides system, database and/or network administration of web and/or communication systems. Tests and analyzes complex network facilities, monitors, and controls the performance of network resources and utilizes software and hardware tools to identify and diagnose factors affecting network performance. Prepares technical implementation plans that provide integrated solutions including actions, milestones, timeline, and critical paths required for complete solutions.

Minimum Education: Associates degree or equivalent.

IT ADMINISTRATOR II – UNCOMN, LLC

Minimum/General Experience: 1–3 years of relevant technical experience.

Functional Responsibility: Provides system, database and/or network administration of web and/or communication systems. Tests and analyzes complex network facilities, monitors, and controls the performance of network resources and utilizes software and hardware tools to identify and diagnose factors affecting network performance. Prepares technical implementation plans that provide integrated solutions including actions, milestones, timeline, and critical paths required for complete solutions.

Minimum Education: Bachelor's degree or equivalent.

IT ADMINISTRATOR III – UNCOMN, LLC

Minimum/General Experience: 3–5 years of relevant technical experience.

Functional Responsibility: Provides system, database and/or network administration of web and/or communication systems. Tests and analyzes complex network facilities, monitors, and controls the performance of network resources and utilizes software and hardware tools to identify and diagnose factors affecting network performance. Prepares technical implementation plans that provide integrated solutions including actions, milestones, timeline, and critical paths required for complete solutions.

Minimum Education: Bachelor's degree or equivalent.

IT ADMINISTRATOR V – UNCOMN, LLC

Minimum/General Experience: 8 years of relevant technical experience.

Functional Responsibility: Provides system, database and/or network administration of web and/or communication systems. Tests and analyzes complex network facilities, monitors, and controls the performance of network resources and utilizes software and hardware tools to identify and diagnose factors affecting network performance. Prepares technical implementation plans that provide integrated solutions including actions, milestones, timeline, and critical paths required for complete solutions.

Minimum Education: Master's degree or equivalent.

IT ARCHITECT I – UNCOMN, LLC

Minimum/General Experience: 0–1 years of relevant technical experience.

Functional Responsibility: Links computer technology decision making and investments with an organization's tech business strategy. Advises on selection of technological purchases and sets standards for relational database structures, networks, and interfaces. Designs and builds relational databases. Develops strategies for data acquisitions, archive recovery and implementation of a database. Works in data warehouse environment developing data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Reviews object and data models and metadata repository to structure data for optimal access.

Minimum Education: Associate's degree or equivalent.

IT ARCHITECT II – UNCOMN, LLC

Minimum/General Experience: 1–3 years of relevant technical experience.

Functional Responsibility: Links computer technology decision making and investments with an organization's tech business strategy. Advises on selection of technological purchases and sets standards for relational database structures, networks, and interfaces. Designs and builds relational databases. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in data warehouse environment developing data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Reviews object and data models and metadata repository to structure data for optimal access.

Minimum Education: Master's degree or equivalent.

IT ENGINEER II – UNCOMN, LLC

Minimum/General Experience: 1–3 years of relevant technical experience.

Functional Responsibility: Performs complex engineering analysis and implementation tasks which are broad in nature and include the design, development, layout, and testing of security related devices or systems. May design or develop new software products or major enhancements to existing software. Addresses problems of systems integration,

compatibility, and multiple platforms. Resolves problems with software. Formulates specifications for complex operating software programming applications or modifies complex existing applications using engineering releases and utilities from the manufacturer. Designs, codes, tests, debugs, and documents those programs. Provides overall operating system support, including file maintenance routines. Assists all phases of software systems programming. Evaluates new and existing software products. Participates in development of software user manuals.

Minimum Education: Bachelor's degree or equivalent.

Minimum Education: Master's degree or equivalent.

NETWORK ENGINEER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Manages an engineering group responsible for telecommunications, networks, and other IT disciplines. Applies extremely complex

networking concepts in the analysis, study, and design of data networks. Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes, and throughput) and recommends procurement, removals, and modifications to network components. Designs and optimizes network topologies and site configurations. Plans and supervises installations, transitions, and cutovers of network components and capabilities. Reviews existing network designs and capabilities with the goal of making refinements, reducing operating overhead, enhancing network throughput, and improving current network topologies. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

NETWORK ENGINEER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Applies extremely complex networking concepts in the analysis, study, and design of data networks. Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes, and throughput) and recommends procurement, removals, and modifications to network components. Designs and optimizes network topologies and site configurations. Plans and supervises installations, transitions, and cutovers of network components and capabilities. Reviews existing network designs and capabilities with the goal of making refinements, reducing operating overhead, enhancing network throughput, and improving current network topologies. Can perform more complex tasks with minimal supervision. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

NETWORK ENGINEER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Applies extremely complex networking concepts in the analysis, study, and design of data networks. Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes, and throughput) and recommends procurement, removals, and modifications to network components. Designs and optimizes network topologies and site configurations. Plans and supervises installations, transitions, and cutovers of network components and capabilities. Reviews existing network designs and capabilities with the goal of making refinements, reducing operating overhead, enhancing network throughput, and improving current network topologies. Can perform all tasks with no supervision required. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

NETWORK ENGINEER VI – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Manages an engineering group responsible for telecommunications, networks, and other IT disciplines. Applies extremely complex networking concepts in the analysis, study, and design of data networks. Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes, and

throughput) and recommends procurement, removals, and modifications to network components. Designs and optimizes network topologies and site configurations. Plans and supervises installations, transitions, and cutovers of network components and capabilities. Reviews existing network designs and capabilities with the goal of making refinements, reducing operating overhead, enhancing network throughput, and improving current network topologies. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Master's degree or equivalent.

NETWORK SPECIALIST I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Provides technical guidance for directing and monitoring information systems operations. Designs, builds, and implements network systems. Directs compilation of records and reports concerning network operations and maintenance. Troubleshoots network performance issues. Analyzes network traffic and provides capacity-planning solutions. Monitors and responds to complex technical control facility hardware and software problems. Interfaces with vendor support service groups to ensure proper escalation during outages or periods of degraded system performance. Manages the purchase, testing, installation, and support of network communications, including LAN/MAN/WAN systems. Performs system-level design and configuration of products including determination of hardware, OS, and other platform specifications. Plans large-scale systems projects through vendor comparison and cost studies. Performs a variety of systems engineering tasks and activities that are broad in nature and are concerned with major systems design, integration, and implementation, including personnel, hardware, software, budgetary, and support facilities and/or equipment. Provides quality assurance review and the evaluation of new and existing software products. Provides assistance and oversight for all information systems operations activities, including computer and telecommunications/communications operations, data entry, data control, LAN/MAN/WAN administration and operations support, operating systems programming, system security policy procedures, and/or web strategy and operations. Provides input to policy level discussions regarding standards and budget constraints. Monitors and responds to hardware, software, and network problems. Provides the routine testing and analysis of all elements of the network facilities (including power, software, communications machinery, lines, modems, and terminals). Utilizes software and hardware tools and identifies and diagnoses complex problems and factors affecting network performance. Troubleshoots network systems when necessary and makes improvements to the network Knowledge/Skill Description Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

NETWORK SPECIALIST II – RED CEDAR TG-MTE, LLC

Performs system-level design and configuration of products including determination of hardware, OS, and other platform specifications. Plans large-scale systems projects through vendor comparison and cost studies. Performs a variety of systems engineering tasks and activities that are broad in nature and are concerned with major systems design, integration, and implementation, including personnel, hardware, software, budgetary, and support facilities and/or equipment. Provides quality assurance review and the evaluation of new and existing software products. Provides assistance and oversight for all information systems operations activities, including computer and telecommunications/ communications operations, data entry, data control, LAN/MAN/WAN administration and operations support, operating systems programming, system security policy procedures, and/or web strategy and operations. Provides input to policy level discussions regarding standards and budget constraints. Supervises all personnel engaged in the operation and support of network facilities, including all communications equipment on various platforms in large scale or multi- shift operations. Supervises complex operations that involve two or more additional functions such as, but not limited to, network operations, systems security, systems software support, and production support activities. Monitors and responds to hardware, software, and network problems. Provides the routine testing and analysis of all elements of the network facilities (including power, software, communications machinery, lines, modems, and terminals). Utilizes software and hardware tools and identifies and diagnoses complex problems and factors affecting network performance. Troubleshoots network systems when necessary and makes improvements to the network. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

NETWORK SPECIALIST III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Provides technical guidance for directing and monitoring information systems operations. Designs, builds, and implements network systems. Directs compilation of records and reports concerning network operations and maintenance. Troubleshoots network performance issues. Analyzes network traffic and provides capacity-planning solutions. Monitors and responds to complex technical control facility hardware and software problems. Interfaces with vendor support service groups to ensure proper escalation during outages or periods of degraded system performance. Manages the purchase, testing, installation, and support of network communications, including LAN/MAN/WAN systems. Performs system-level design and configuration of products including determination of hardware, OS, and other platform specifications. Plans large-scale systems projects through vendor comparison and cost studies. Performs a variety of systems engineering tasks and activities that are broad in nature and are concerned with major systems design, integration, and implementation, including personnel, hardware, software, budgetary, and support facilities and/or equipment. Provides quality assurance review and the evaluation of new and existing software products. Provides assistance and oversight for all information systems operations activities, including computer and telecommunications/ communications operations, data entry, data control, LAN/MAN/WAN administration and operations support, operating systems programming, system security policy procedures, and/or web strategy and operations. Utilizes software and hardware tools and identifies and diagnoses complex problems and factors affecting network performance. Troubleshoots network systems when necessary and makes improvements to the network. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Master's degree or equivalent.

PROGRAM MANAGER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Provides program management for multiple projects. Prepares project implementation plan, coordinates project activities, monitors project milestones, and provides progress reports. Responsible for all aspects of performance (i.e., technical, contractual, administrative, financial). Consults with the customer to ensure adherence to contractual obligations establishes and maintains technical and financial reports to show progress of projects to management and customers, organizes and assigns responsibilities to subordinates, and oversees the completion of all assigned

tasks. Performs overall management of contract support operations, possibly involving multiple projects and groups of personnel at multiple locations. Organizes, directs, and coordinates the planning and production of all contract support activities. Able to manage smaller programs with minimal supervision. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

PROGRAM MANAGER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Provides program management for multiple projects. Prepares project implementation plan, coordinates project activities, monitors project milestones, and provides progress reports. Responsible for all aspects of performance (i.e., technical, contractual, administrative, financial). Consults with the customer to ensure adherence to contractual obligations establishes and maintains technical and financial reports to show progress of projects to management and customers, organizes and assigns responsibilities to subordinates, and oversees the completion of all assigned tasks Performs overall management of contract support operations, possibly involving multiple projects and groups of personnel at multiple locations. Organizes, directs, and coordinates the planning and production of all contract support activities. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Able to manage all programs with no supervision required. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

PROGRAM MANAGER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Provides program management for multiple projects. Minimum Education: Master's degree or equivalent.

PROGRAM/PROJECT MANAGER II – UNCOMN, LLC

Minimum/General Experience: 1–3 years of relevant technical experience.

Functional Responsibility: Manages and leads team on large projects or significant segment of large complex projects. Analyzes new and complex project related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components.

Minimum Education: Bachelor's degree or equivalent.

PROGRAM/PROJECT MANAGER III – UNCOMN, LLC

Minimum/General Experience: 3–5 years of relevant technical experience.

Functional Responsibility: Manages and leads team on large projects or significant segment of large complex projects. Analyzes new and complex project related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components.

Minimum Education: Bachelor's degree or equivalent.

PROGRAM/PROJECT MANAGER V – UNCOMN, LLC

Minimum/General Experience: 8 years of relevant technical experience.

Functional Responsibility: Manages and leads team on large projects or significant segment of large complex projects. Analyzes new and complex project related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components.

Minimum Education: Master's degree or equivalent.

PROJECT MANAGER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Responsible for assisting the management of small to medium-sized projects. Assists in preparing implementation plan, coordinates activities, monitors milestones, and provides progress reports. Creation and management of project information related to contractual requirements and cost for submittal to the program manager for review and approval. Must have rudimentary understanding of accounting, management, and contract principles. Performs day-to-day management of assigned delivery order projects that involve teams of data processing and other information system and management professionals who have previously been involved in analyzing, designing, integrating, testing, documenting, converting, extending, and implementing automated information and telecommunications systems. Demonstrates proven skills in those technical areas addressed by the delivery order to be managed. Organizes, directs, and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates writing and oral communication skills. May defer more complex problems to more senior project managers. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

PROJECT MANAGER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Minimum Education: Master's degree or equivalent.

SOFTWARE ENGINEER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Develops and customizes application servers and toolsets to enhance business processes, including workflow development, knowledge, and data management. Research, test and report capabilities of technology products, application server and toolsets, with business analysts to map business and functional requirements. Develops and applies departmental and organization- wide business modernization and process improvements models for use in designing and customizing integrated, shared application servers and knowledge and data management systems. Analyzes and resolves application software and toolset issues. Relies on experience and judgment to plan and accomplish goals. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

SOFTWARE ENGINEER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Develops and customizes application servers and toolsets to enhance business processes, including workflow development, knowledge, and data management. Research, test and report capabilities of technology products, application server and toolsets, with business analysts to map business and functional requirements. Develops and applies departmental and organization-wide business modernization and process improvements models for use in designing and customizing integrated, shared application servers and knowledge and data management systems. Analyzes and resolves application software and toolset issues. Relies on experience and judgment to plan and accomplish goals. Can complete tasks of intermediate complexity alone and may only require supervision provided by more experienced personnel for more complex problems. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

SOFTWARE ENGINEER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Develops and customizes application servers and toolsets to enhance business processes, including workflow development, knowledge, and data management. Works closely with the information technologists to identify the best technological solution to technical issues. Familiar with a specific field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Responsible for developing project plans, justifications, guidelines, and controls. Provides technical/ management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Master's degree or equivalent.

SUBJECT MATTER EXPERT II – UNCOMN, LLC

Minimum/General Experience: 1–3 years of relevant technical experience.

Functional Responsibility: Managers Provides client leadership with expert insight and advice regarding strategic vision and direction. Applies principles, methods, and

knowledge of the functional area of capability to specific task order requirements and advanced mathematical principles and methods to exceptionally difficult and narrowly defined technical problems. Supports the creation and implementation of comprehensive, innovative improvements in information system architecture, communications protocols, risk management and/or life-cycle management. Possesses enterprise-wide knowledge and experience.

Minimum Education: Bachelor's degree or equivalent.

SUBJECT MATTER EXPERT III – UNCOMN, LLC

Minimum/General Experience: 3–5 years of relevant technical experience.

Functional Responsibility: Provides client leadership with expert insight and advice regarding strategic vision and direction. Applies principles, methods, and knowledge of the functional area of capability to specific task order requirements and advanced mathematical principles and methods to exceptionally difficult and narrowly defined technical problems. Possesses enterprise-wide knowledge and experience.

Minimum Education: Master's degree or equivalent.

SYSTEMS ADMINISTRATOR I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Responsible for the installing, managing, maintaining, and troubleshooting hardware and software on systems, to maintain the on-going operational performance of programs (software) and the hardware on which the programs run within the Mainframe, Mid-Range, or PC environments. Implements and supports local area network (LAN) and Wide area network (WAN) hardware and software. Analyzes customer workflow and procedures to recommend operational support tools and technologies to satisfy customer needs. Acts as a liaison between the customer, suppliers, and other technical groups to resolve network and hardware problems. Analyzes performance problems and recommends solutions to enhance functionality, reliability and/or usability.

Implements operational support standards and procedures relating to change management, performance management, and security. Recommends changes and improvements to existing standards. Provides support for the overall IT system administration activities such as user access, backup and recovery procedures, patches and upgrades, tuning, and performance. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

SYSTEMS ADMINISTRATOR II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Responsible for the installing, managing, maintaining, and troubleshooting hardware and software on systems, to maintain the on-going operational performance of programs (software) and the hardware on which the programs run within the Mainframe, Mid-Range, or PC environments. This position will perform managerial duties as requested with minimal support from more experienced personnel. May supervise others.

Minimum Education: Master's degree or equivalent.

SYSTEMS ENGINEER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Provides analysis related to the design, development, and integration of hardware, software, machine interfaces, and all system level requirements to provide an integrated IT solution. Develops integrated system test requirement, strategies, devices, and systems. Directs overall system level testing. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

SYSTEMS ENGINEER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Provides analysis related to the design, development, and integration of hardware, software, machine interfaces, and all system level requirements to provide an integrated IT solution. Develops integrated system test requirement, strategies, devices, and systems. Directs overall system level testing. Can perform more complex tasks with minimal supervision. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

SYSTEMS ENGINEER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Provides analysis related to the design, development, and integration of hardware, software, machine interfaces, and all system level requirements to provide an integrated IT solution. Develops integrated system test requirement, strategies, devices, and systems. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Directs overall system level testing. Can perform more complex tasks with minimal supervision. Contributes to deliverables and performance metrics where applicable. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

SYSTEMS ENGINEER IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Provides analysis related to the design, development, and integration of hardware, software, machine interfaces, and all system level requirements to provide an integrated IT solution. Develops integrated system test requirement, strategies, devices, and systems. Directs overall system level testing. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. This position will perform managerial duties as requested with minimal support from more experienced personnel. May supervise others.

Minimum Education: Master's degree or equivalent.

TECHNICAL WRITER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Writes a variety of technical articles, reports, brochures, and/or manuals for documentation for a wide range of uses. Coordinates the display of graphics and the production of the document. Ensures content is of high quality and conforms with standards. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

TECHNICAL WRITER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Writes a variety of technical articles, reports, brochures, and/or manuals for documentation for a wide range of uses. Coordinates the display of graphics and the production of the document. Ensures content is of high quality and conforms with standards. Can perform more complex tasks with minimal supervision. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

TECHNICAL WRITER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Writes a variety of technical articles, reports, brochures, and/or manuals for documentation for a wide range of uses. Coordinates the display of graphics and the production of the document. Ensures content is of high quality and conforms with standards. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

TECHNICAL WRITER IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Writes a variety of technical articles, reports, brochures, and/or manuals for documentation for a wide range of uses. impact on overall project implementation. This position will perform managerial duties as requested with minimal support from more experienced personnel. May supervise others.

Minimum Education: Master's degree or equivalent.

TECHNICAL WRITER II – UNCOMN, LLC

Minimum/General Experience: 1–3 years of relevant technical experience.

Functional Responsibility: Provides administrative, clerical, and support services to technical, professional, and management level staff for project tasks. Work includes support of operational programs, preparation and monitoring of budgets, technical writing, editing, events planning and facilitation.

Minimum Education: Bachelor's degree or equivalent.

TECHNICAL WRITER III – UNCOMN, LLC

Minimum/General Experience: 3–5 years of relevant technical experience.

Functional Responsibility: Provides administrative, clerical, and support services to technical, professional, and management level staff for project tasks. Work includes support of operational programs, preparation and monitoring of budgets, technical writing, editing, events planning and facilitation.

Minimum Education: Bachelor's degree or equivalent.

TECHNOLOGY ENGINEER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Performs computer engineering and software development. Analyzes business processes, functions, and procedures to develop the best software. Establishes systems specifications and objectives. Participates in systems development and design, including software programming and user interface design. Formulates test plans, coordinates, and performs software testing. Has application knowledge of commonly used concepts, practices and procedures with the information technology fields. Analyzes engineering problems and develops solutions. Makes recommendation after performing system analysis. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

TECHNOLOGY ENGINEER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Performs computer engineering and software development. Leads engineers in the activities of solving computer problems and enabling computer technology to meet the needs of the organization. Assigns, coordinates, and reviews work of engineering personnel. Responsible for applying concepts or modernization, innovation, consolidation, and cost reduction to assigned tasks. A certain degree of creativity and latitude is expected. Contributes to deliverables and performance metrics where applicable. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

TECHNOLOGY ENGINEER III – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 3-5 years of relevant technical experience.

Functional Responsibility: Performs computer engineering and software development. Applies full understanding of computer engineering discipline and industry best practices plus innovation to effectively design, implement, and support software products. Gives technical guidance to other engineers in the team. Analyzes engineering problems and develops innovative solutions. Leads engineers in performing system trade studies to maximize investments in equipment, personnel, and business processes. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's degree or equivalent.

TECHNOLOGY ENGINEER IV – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 5-7 years of relevant technical experience.

Functional Responsibility: Performs computer engineering and software development. This position will perform managerial duties as requested with minimal support from more experienced personnel. May supervise others.

Minimum Education: Master's degree or equivalent.

TEST ENGINEER I – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 0-1 years of relevant technical experience.

Functional Responsibility: Evaluates, recommends, and implements automated test tools and strategies. Designs, implements, and conducts test and evaluation procedures to ensure system requirements are met. Develops, maintains, and upgrades automated test scripts and architectures for application products. Also writes, implements, and reports status for system test cases for testing. Analyzes test cases and provides regular progress reports. Serves as subject matter specialist providing testing knowledge/experience for the support of user requirements of complex to highly complex

software/hardware applications. Directs and/or participates in all phases of risk management assessments and software/hardware development with emphasis on analysis of user requirements, test design and test tools selection. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's degree or equivalent.

TEST ENGINEER II – RED CEDAR TG-MTE, LLC

Minimum/General Experience: 2-4 years of relevant technical experience.

Functional Responsibility: Evaluates, recommends, and implements automated test tools and strategies.
